

If you want to give your engine the maximum protection it deserves, you should replace your pressure oil screen and install an oil filter. Oil filters protect the internal parts of your engine from damage, increase your oil change interval and allow better diagnostics if you should have a contamination problem.

**Angled easy access, no spill adapter, oil filter and gaskets

Both adapters fit many kit built aircraft like Van's RV series. The angled adapter requires a additional spacer and four mounting bolts when used on a Van's RV4 or RV8 These parts add an additional \$50.00 to the cost of the Angled Easy Access Adapter.

All Pricing subject to change without notice.

Not applicable to 76 series engines. 4-19-2011
